APPENDIX OF MARKED-UP VERSION OF CLAIMS

1 (Amended). [A method of trapping and/or killing pests, such as insects, wherein at least a part of a pest to be trapped or killed is exposed to a particulate composition comprising particles containing or consisting of at least one magnetic material, in combination with one or more pesticides or behaviour modifying chemicals.]

A method of trapping insects with an insect trap having a housing defining an entrance and a trapping area disposed below the entrance, the method comprising the step of:

coating a zone of or within the housing with a composition including particles comprising a magnetic material, whereby an insect in contact with the composition becomes at least partially coated with the composition and is destabilized, thereby falling into the trapping area.

17 (Amended). A pesticidal composition in particulate form [which comprises] including particles [containing or consisting of] comprising a magnetic material in admixture with a pesticide or behavior modifying chemical, or particles of a magnetic material coated with a pesticide or behavior modifying chemical.

23 (Amended). An insect trap comprises a housing, a zone of the housing or a zone within the housing comprising a magnetically polarized material and the zone being coated with a composition [comprising] including particles [containing or consisting of] comprising a magnetic material of opposite polarity to that of the magnetically polarized material.
